EZOCEAN team have been watching blank sailing situation since 2020. We began to sum up blank sailings within nine weeks from September 2020. By this summary we have total one year's statistics. Putting them together, we can see the change & trend from the perspective of trade or alliance

Blank sailings are increasing. The number of blank sailings during Chinese New Year holiday was no longer the peak. If blank sailings in the first half of 2020 were intentionally arranged by carriers, blank sailings since the second half of 2020 are arranged by carriers with on other choice. There is no extra vessel to copy with delays. With more new services on to Transpacific West Coast, more blank sailings are showing up.

Below table shows twelve blank sailing summaries by trade.

- Ocean alliance is quite stable with relatively small volume of blank sailings.
- 2M alliance's blank sailing number once peaked with 31 blank sailings within nine weeks, but gradually decreased since June 2021.
- Other non-alliance services have more blank sailings since July 2021.
