## 2021 Asia – MED Service Calling Density

Up to April 2021, there are in total 17 services from Asia to Mediterranean: 4 for Ocean alliance, 3 for 2M, 3 for THE, and 7 others operated jointly or individually. Compared to 2020, the total number of services has been reduced by 1, namely 2M alliance's DRAGON. There is no major change in general.

Since each carrier uses different service codes, for the following tables, EZOcean uses the service code assigned by the carrier that deploys the most vessels. If you need to look up the service codes used by other alliance members, you may refer to the list of service codes at the end of this article.

- **Origin Port Calling Density**

Looking at the calling density of origin ports, Shanghai, Ningbo, and Singapore all rank first, with ten services for each port. They are followed by Busan (9 services) and Shekou (7 services). All services are from the three big alliances. All the ten alliance services call Shanghai, Ningbo, and Singapore. Callings in Shenzhen are mostly at Shekou, with 7 directly calling services. This is different from Trans Pacific and Asia-NEU services, which mostly call Yantian. Ocean alliance calls every port in South China. 2M alliance calls all South China ports except Hong Kong. THE alliance only calls Shekou in South

## China.

Services from the three big alliances rarely involve the Indian Sub-Continent and the Middle East (only three services do so). Most of these services are operated individually by shipping companies or by other cooperation.

### ● Destination Port Calling Density

Destination ports in Mediterranean are divided into four regions: West Med (Italy, Spain etc.), East Med (Turkey, Israel, etc.), Adriatic Sea (Croatia etc.), and Black sea (Ukraine etc.). THE alliance and 2M alliance and other jointly or individually operated services mostly call West MED and East MED. Ocean alliance calls ports in all four regions.

Compared to last year, ports in Med-west have either increased or decreased callings. Ports that have increased callings are Vado Ligure(new) and Gioia Tauro (1 more), all are Italian ports. Ports that have decreased callings are Genoa (2 less), La Spezia (2 less), Valencia (2 less), and Fos (1 less).

	2	Tekidag								■		■						
	1	Tripoli											■					

Callings in the Adriatic Sea region are the same as last year. The Black Sea region no longer has service that directly calls Chornomorsk in Ukraine. This year Romania's Constanza has one less directly calling service.

Ports that rank first to third in destination port calling density are Port Said (8), Valencia (6) / Piraeus(6), and Barcelona(5) / Fos(5) / Genoa(5) / Istanbul(5) / Izmit(5). We may see that popular ports of calling are mostly in West-MED's

Spain and East-MED's Turkey and Egypt.
